-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 29 April 2005.
- 2a) This action is FINAL. 2b) This action is non-final.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9,12-21,24-26,29,30 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) in view of either German '111 (German) or Japanese '927 (Japan). APA is the apparatus listed in the first few pages of the specification. For example, this apparatus includes all of the elements of claim 1 except for the use of a guard which results in a safety problem. Both secondary references solve this problem by using guards in similar crushers. In order to provide for a needed safety feature, it would have been obvious for one of ordinary skill in the art to modify APA by providing a guard above the crusher, taught to be desirable by both the secondary references. The remaining limitations would then have been obvious design choices only. For example, the use of dampening means is well known in the art and of

no patentable merit. Also, the exact guard support means would have been a design choice only as it solves no stated problem.

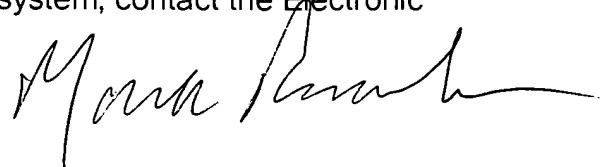

Claims 10,11,22,23 are rejected under 35 U.S.C. 103(a) as being unpatentable over APA in view of either Japan or German as applied to claim1 above, and further in view of Reid. The basic combination does not provide for a spray to suppress dust. Reid solves this problem by disclosing similar apparatus including spray means for dust suppression. In order to provide for dust suppression, it would have been obvious for one of ordinary skill in the art to modify APA by providing spray means, taught to be desirable by Reid.

Claims 27,28 are rejected under 35 U.S.C. 103(a) as being unpatentable over APA, as used above, in view of Reid. See the above paragraph for the use of Reid.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Rosenbaum whose telephone number is 571-272-4523. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on 571-272-4419. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
